

KEHLESEY HOMAN

kehlseyh@gmail.com | kehlseyhoman.com | Detroit, MI

SUMMARY

Senior fullstack engineer with 7+ years of experience building Angular and React applications and supporting Java and Spring Boot services at enterprise scale. At General Motors, contributed to six production applications over 5.5 years, delivering 350+ features and 300+ bug fixes across internal tools, dealer-facing platforms, and executive dashboards, including end-to-end frontend and backend feature ownership on three applications. Builds and maintains REST APIs, PostgreSQL schemas, and CI/CD pipelines independently across the full request-response cycle.

LANGUAGES & TECHNOLOGIES

Languages: Java, TypeScript, JavaScript, Python, HTML, CSS, SCSS

Frameworks & Libraries: Spring Boot, Angular (v14-21), Angular Signals, RxJS, React, Vite, Vue.js, Angular Material, Material UI (MUI), Chart.js, Jest, Playwright

Cloud & DevOps: GitHub Actions, CI/CD pipelines, Azure DevOps, Kubernetes, Red Hat OpenShift, Argo CD, Netlify, Cloudflare, Datadog

Tools & Platforms: PostgreSQL, SQL, Supabase, Maven, Claude Code, Cursor, GitHub Copilot (agent workflows), Databricks, IntelliJ, VS Code, Jira

EXPERIENCE

General Motors

Detroit, MI

Software Engineer - Fullstack / Frontend Lead

January 2021 - May 2026

- Owned frontend architecture on three of six enterprise production applications, designing scalable component systems and leading feature development end to end; built features and components on the remaining three in a contributor capacity alongside application owners
- Delivered end-to-end frontend and backend feature work on three applications, building REST API endpoints, fixing backend bugs, and contributing to existing Java and Spring Boot services alongside backend-owning teams
- Led all frontend development for a full rebuild of a legacy incentive management platform serving ~50 internal users across the US and Canada, modernizing a 2018 Angular codebase over a 2-year initiative on a team of 5
- Led homepage feature development on a React application used by thousands of dealership users across the US and Puerto Rico for lease, purchase, and fleet pricing workflows, building a permission-aware dashboard with real-time bundle status tracking and a customized MUI data table supporting filtering by VIN, date range, and status
- Led frontend development on an executive financial planning application delivering complex Chart.js dashboards driven by Databricks data to all senior GM leadership; integrated Glean Web SDK to ship LLM-powered knowledge retrieval, enabling users to surface internal documentation and query Databricks financial data without leaving the application
- Served as Innovation Owner on a flagship application, overseeing 50+ SOX-compliant production deployments via Azure DevOps with zero unplanned downtime; maintained CI/CD pipelines in GitHub Actions and Azure DevOps with an automated Playwright suite that caught regressions before reaching production
- Enforced strict change control, audit trail requirements, and approval workflows throughout the SDLC on a SOX-regulated application, coordinating enterprise-level security upgrades and database migrations across partner teams

Gentex

Zeeland, MI

Production Support Engineer

July 2019 - December 2020

- Developed and maintained internal production-facing tools in Angular and TypeScript, improving process reliability for manufacturing operations teams

Self-Employed

Remote

Frontend Web Developer - Freelance

March 2018 - Present

- Designed and deployed production websites for 3 small business clients; migrated the 2 actively maintained sites from WordPress to custom React and TypeScript builds with Vite, deployed on Netlify with Cloudflare DNS, handling redesign, performance optimization, and ongoing maintenance

PROJECTS

Offerwatch - Personal SaaS Project

2026 - Present

github.com/KehlseyHoman/offerwatch

- Building a full-stack SaaS job tracker in Angular 21 and Spring Boot with JWT authentication, Google Sign-In, PostgreSQL on Supabase, and Railway deployment
- Implementing a freemium model with a free-tier cap, Stripe billing planned for paid tiers, and row-level security via Spring Security; owns the full product lifecycle from UI/UX and REST API design through PostgreSQL schema, CI/CD pipeline, and production infrastructure

EDUCATION

B.S. Computer Science - Grand Valley State University
